Professional Summary

A data analyst with 15 years of experience in customer service and company operations, as well as a solid understanding of SQL, Tableau, and Excel. I've led data-driven decision-making processes, optimized business performance with SEO and web analytics, and created detailed dashboards to track KPIs, sales forecasts, and spending. Passionate about extracting insights from data, my hands-on experience in data analytics is backed up by Google and IBM certifications, as well as a proven track record in project management and customer relationship management.
